Overview of Break Out Sessions

Logistics & Supply Chain Panel:

Logistics & Supply Chain Innovation - How IT Can Drive Increased Revenue and Market Share, Not Just Cost Savings

Join a panel of Supply Chain business and IT experts as they share their insights into the opportunities to invest in supply chain to not only cut costs but also to drive increases in revenue and grow market share and retain existing customers. We are in a time when many businesses are focused on cutting costs, and in some cases customer service and responsiveness, to bare minimums. Hear from and submit your questions to business-savvy innovators who see these challenging times as an opportunity to lure market share from their competition.

Business Intelligence Panel

BI Trends in the Current Market Place – What's New and What's Coming

Come hear experts from some of the leading software technology firms in the business intelligence and data warehousing space talk about the current economy's impact on business intelligence and what the future holds. This will be a facilitated panel discussion. Please provide us your questions in advance or bring them with you to the meeting. We look forward to seeing you at this informative and highly interactive BI Executive Forum event.

Small & Medium Business SIG

How SMBs are Leveraging Virtualization

Hear how other IT leaders of SMBs have leveraged virtualization to reduce costs and improve productivity. Learn what's next in virtualization strategies.

Sales Leadership & Business Development SIG

In the Mind of the CIO

Come gain valuable insights into the interests and challenges of CIOs. Learn more about the CIO role and how to build a relationship with a CIO to become a trusted advisor. Find out how CIOs are measured and paid and improve your understanding of their current concerns so you can structure solutions that enable their success. The session will close with a discussion of next steps you can take to develop more effective relationships with these critical business executives.
